RESOLUTION ON THE ANNUAL IRRIGATION REVENUE REPORT FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

CALCUTTA, THE 11TH DECEMBER 1919.

RESOLUTION—No. 5389I.

READ—

The Annual Irrigation Revenue Report for the year 1918-19.

The Major Irrigation Works in Bengal are the Midnapore and Hijli Tidal Canals. The works are in operation. The **Minor Works** for navigation are the Calcutta and Eastern Canals, the Madaripur Bil Route, a portion of the Orissa Coast Canal, the Nadia Rivers and the Gaighatta and Baxi khal. The only irrigation work of this class is the Eden Canal. Training works on the rivers Ganges, Bhagirathi, Dhaleswari and Buriganga and anti-malarial drainage works carried out by this department at the cost of Government are classed under this head.

2. The capital outlay on the Major Works to the end of March 1919 amounted to Rs. 1,11,14,189. The works constructed for this outlay comprise two weirs across the Cossye River at Midnapore and at Panchkura and 98.75 miles of main and branch canals, of which 69.75 miles provide for both irrigation and navigation and 29 miles for navigation only; there are in addition 254.5 miles of distributaries. The Terapakia Pass khal, Palaboni khal and the khal leading to the Gewankhali Lock entrance, of which the aggregate length is 20.75 miles, are also maintained for navigation and included as part of the Hijli Tidal Canal. During the year under review no addition was made to the length of the canals or distributaries.

3. The total receipts from the Major Works amounted to Rs. 3,04,605 and the working expenses to Rs. 2,42,463, the result being a net revenue of Rs. 62,142 against Rs. 97,363 in the preceding year. This result is chiefly due to the increase in working expenses of the Hijli Tidal Canal consequent on the silt clearance of Range I, for which purpose the canal had to be closed to traffic for about a month and a half. The general revenues of these canals, which depend considerably upon receipts from navigation, have suffered of late years from railway competition. During the year under review there was, however, some increase in navigation receipts due to the diversion, as in the previous year, of traffic from the railway to the canals owing to restriction on rail-borne goods traffic due to causes arising out of the war.

4. The area irrigated during the year was 80,749 acres as compared with 87,507 acres in 1917-18, and an average of 85,661 acres for the triennium ending March 1918. The decrease was due to seasonable and well distributed rainfall at the commencement of the kharif season.

5. The capital outlay on canals classed as **Minor Works and Navigation** was Rs. 4,02,781 during the year and Rs. 1,41,45,885 to end of the year. The receipts for the year amounted to Rs. 8,87,323 and the working expenses to Rs. 5,72,777.

The financial results of the year and the capital expenditure to date are exhibited in the following statement :—

	CAPITAL EXPENDITURE, DIRECT AND INDIRECT.		Receipts of the year less refunds.	Expenditure of the year less refunds.	Net revenue of the year.	Net revenue of the previous year.
	Of the year.	To end of the year.				
<i>Minor Works and Navigation.</i>	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern Canals ...	64,884	97,33,054	4,75,974	3,81,911	94,063	—93,835
Madaripur Bil Route ...	3,37,897	43,59,793	3,50,251	80,367	2,69,884	2,63,058
Orissa Coast Canal	17,098	9,666	7,432	—17,119
Nadia Rivers	19,950	48,074	—28,124	—82,510
Gaighatta and Baxi Khal	1,450	459	991	2,387
Eden Canal	22,600	52,101	—29,501	9,557
Grand Trunk Canal	53,038
Total ...	4,02,781	1,41,45,885	8,87,323	5,72,578	3,14,745	81,534

6. **The Calcutta and Eastern Canals** form a series of navigable channels mostly natural but partly artificial, by which communication is maintained between Calcutta and Eastern Bengal. The receipts from navigation tolls amounted to Rs. 4,53,867 as compared with Rs. 3,46,216 in the preceding year. The capital outlay incurred during the year was expended principally, as in the three previous years, on the improvement of the Gabkhan-Bharani khal from Chōwkhata to Jhalakati, which was completed during the year at a total cost of Rs. 7,36,535 for works only. This channel which has been improved in order to avoid the tortuous and dangerous route *via* the Angeria khal, will now form a link in the main route for steamers between Khulna and Barisal. Capital expenditure was also incurred during the year on the excavation of the Kankrabunia khal in the western Sundarbans, which, when

completed, will serve as an alternative to the Doagra Channel which is rapidly dying.

7. The capital expenditure during the year on the **Madaripur Bil Route**, which connects the Madhumati and Kumar rivers in the district of Faridpur, was incurred chiefly on (1) the improvement of the Lower Kumar river, including easing bends therein, and (2) the construction of an embankment with sluices along the south bank of the channel. The completion report of the project received the approval of the Secretary of State in June 1919. The construction estimate has been closed with effect from the 31st March 1917. These works paid a return of 6·9 per cent. in 1916-17, 6·5 per cent. in 1917-18, and 6·2 per cent. in 1918-19. No less than 5,880 steamers and flats made use of this route during the year under review transporting 424 lakhs of maunds of cargo.

8. **The Orissa Coast Canal** in conjunction with the Hijli Tidal Canal affords communication between Bengal and Orissa, and previous to the opening of the Bengal-Nagpur Railway was the only inland route by which supplies of food could be conveyed into Orissa in time of famine. This canal, which is intended for navigation only, now lies partly (*i.e.*, for a length of 45 miles) in this presidency and partly in the province of Bihar and Orissa. The receipts and working expenses (direct and indirect) for the portion within Bengal were, respectively, Rs. 17,098 and Rs. 9,666 as against Rs. 14,587 and Rs. 31,706 in the year 1917-18. The increased receipts were due to the diversion of railway traffic to the canal. The decrease in working expenses was due to the fact that no extensive repairs to the locks, etc., were necessary during the year.

9. The work in the **Nadia Rivers** consists in the training of the river channels by bandals with the two-fold object of maintaining by the scouring of shoals a sufficient depth of water for boat traffic and at the same time improving the sanitation of the country. The former object is only partially attained, but the work done is of use in the interests of sanitation. The committee appointed in February 1917 to consider the report on the Nadia Rivers submitted by Major F. C. Hirst, I.A., Director of Surveys, Bengal, and to advise Government upon the steps to be taken to carry out systematic observations of the changes in the Nadia Rivers, and also, if possible, to improve their condition as navigable channels and as feeders for the Lower Hooghly, have since submitted their report; and it is now before Government. The receipts and working expenses of the Nadia Rivers were Rs. 19,950 and Rs. 48,074, respectively, as against Rs. 16,667 and Rs. 99,187 in the preceding year. Though there has been a slight increase in receipts during the year, it is not likely that, with the growth of railway lines on either bank of the Bhagirathi, and the continued inefficiency of these rivers for the purpose of navigation, in addition to reduction in the rates of tollage from 1906, this system will ever pay its working expenses.

10. **The Gaighatta and Baxi Khal** is a short channel connecting the rivers Damodar and Rupnarain. A sum of Rs. 459 was spent during the year on the upkeep of the khal. The collection of tolls on boat traffic was leased out for two years from 1st April 1917 to 31st March 1919 at a rental of Rs. 3,400 per annum. Owing to restricted boat navigation during the year on account of the silted up condition of the channel, a remission of rent had to be granted to the lessee, and the rent realised amounted to Rs. 1,450 only.

11. **The Eden Canal** was originally constructed for sanitary reasons, but it is now used to some extent for irrigation. It was worked during the year at a loss of Rs. 29,501, against a profit of Rs. 9,557 in the preceding year. This was due to a decrease in the area irrigated during the year, and to an increase in the cost of maintaining the canal including the cost of new works taken up and completed.

12. The work in connection with **the improvement of the Bidyadhari River** by creating a spill reservoir for the flood tide was in progress during the year. The operations already undertaken have proved satisfactory; and it is expected that the continuation and extension of the operations will

effect further improvement by which the life of the river will probably be prolonged for a number of years.

13. Surveys were continued during the year in connection with projects for mitigating the effects of the Damodar floods, and the following works besides those dealt with in the last year's resolution were started with that object in view :—

- (a) the improvement of the Hoorhoora khal,
- (b) the improvement of the Uchchi Nala as a drainage outfall,
- (c) the raising of the embankments on the south of the Ajai River, and
- (d) the raising of the Damodar left embankment.

Investigations were carried out in connection with storage reservoirs in the basin of the Damodar and Barakar Rivers. Surveys were also carried out in connection with the proposed Damodar canal project.

14. (i) **Training works** were, as usual, carried out in the Dhaleswari and Buriganga rivers to facilitate navigation and to improve the water-supply of the town of Dacca. Dredging operations were also carried out on the off-take (from the Jamuna) of the Dhaleswari River. These dredging operations were started on the 8th November 1918, but had to be stopped on the 28th December 1918 owing to the possibility that the dredger "Foyers" might be shut in by the falling river. These operations were successful to a certain extent, the result being an increased flow of water in the Dhaleswari river throughout the cold and hot weather seasons.

Spurs were also erected in the Buriganga with the object of deflecting the current to the right bank of the river and inducing a greater flow through the Ati khal. The results proved satisfactory.

(ii) Training works were carried out also during the year through the agency of the India General Navigation and Railway Company, Ltd., on the river Ganges between Rajmahal and Goalundo.

(iii) To improve navigation as well as the sanitary conditions and water-supply of the town of Rampur Boalia, training works were carried out on the inner channel of the river Ganges.

(iv) At the mouth of the Bhagirathi River, at its off-take from the Ganges, no dredging operations were done during the year owing to adverse circumstances; endeavours were made to improve the channel by means of bandalling only, so as to improve sanitary conditions by an increased flow in the river. The operations were not successful.

15. **General.**—The most important problems with which the Irrigation Branch of the Public Works Department in Bengal have to deal are not connected with irrigation properly so called, but are mainly of a sanitary character, or are in connection with navigation or works of protection against floods. The work of the branch may be divided into (a) irrigation; (b) flood disposal and regulation, both tidal and non-tidal; (c) river training, both tidal and non-tidal; (d) drainage, both tidal and non-tidal; (e) anti-malarial drainage; and (f) navigation, open and closed canals for boats and inland steamers. The problems to be faced are of a very far-reaching character and affect practically the whole of Bengal, which is below the high flood-level of the network of rivers which intersect it. These rivers spill over their banks when in flood and irrigate large areas of rice, and deposit the suspended silt on the land, which acts both as a fertilizer and in building up the land itself. The problem which then arises is to regulate the water on the land, and to provide for its final drainage after the crop has matured; and the whole question is therefore one of irrigation combined with agricultural and sanitary drainage. As such rivers are apt to change their course, the natural channels become blocked both from natural and artificial causes, the areas submerged by flood become stagnant bils, and the whole country suffers from lack of proper irrigation and drainage. It is this side of the problem which requires special study and special engineering treatment for proper development. The solution of these problems depends to a very great extent on the

observations of land levels and the collection of accurate hydraulic data over very large areas.

The surveys started in October 1917 in connection with the conservancy of the rivers Dhaleswari and Buriganga were continued during the year, and the Executive Engineer placed on special duty for the purpose continued his investigations throughout the year. He has submitted certain projects which are now under consideration.

Investigations in connection with anti-malarial works into the drainage conditions over large areas in the districts of Jessore, Nadia, Khulna, Midnapore and the 24-Parganas were continued and valuable information obtained.

16. The Irrigation Department during the year was in charge of Mr. F. A. A. Cowley. The thanks of Government are due to him for the efficient conduct of the affairs of the department during the year and to Mr. Addams-Williams, C.I. E., Superintending Engineer on special duty, for his zeal and energy in the conduct of the enquiries into the drainage conditions in this presidency. The good work of other officers has also been noted by Government.

ORDER.—Ordered that a copy of this resolution be published in the *Calcutta Gazette* and that a copy thereof and of its accompaniments be submitted to the Government of India in the Public Works Department and circulated to other Governments and to all departments and officers of this Government as usual.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

Wholesale prices-current of food grains, salt, etc., in the under-mentioned marts of Bengal for the second-half of November 1919.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sabeiganj. The zero of gauge at Rajmahal 56'46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56'319 ft. above M.S.-L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5'78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2'43 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1'509 ft above M.S.-L.

(c) From the 25th January 1915 to 4th April 1919 the zero of gauge at Berhampore was 30'99 ft. above M.S.-L. From (d) From the 25th October 1916 a temporary wooden gauge with its zero at 49'00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1'51 ft. above M.S.-L.

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 12th December 1919.

RESOLUTION ON THE ANNUAL PROGRESS REPORT ON THE FOREST ADMINISTRATION IN THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING THE 30TH JUNE 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Forests Branch.

CALCUTTA, THE 19TH DECEMBER 1919.

RESOLUTION—No. 9655For.

READ—

The Annual Progress Report on the Forest Administration in the Presidency of Bengal for the year ending the 30th June 1919.

READ ALSO—

The corresponding report of the previous year and the Government Resolution thereon.

SIR HENRY FARRINGTON was in charge of the Bengal Forest circle throughout the year. He was on tour for 289 days and inspected all the

divisions and divisional offices except Darjeeling, which was inspected after the close of the year. During the year Messrs. L. E. S. Teague, Deputy Conservator of Forests, and J. M. Cowan, Assistant Conservator of Forests, were released from military duty, but Mr. A. R. Nicholson, Deputy Conservator of Forests, remained on that duty throughout the year.

2. **Changes in area and administration.**—The only real change made in the area under the different classes of forests during the year was due to the notification of several areas aggregating 4 square miles in the Darjeeling, Jalpaiguri and Buxa divisions as reserved forest. The total area of all classes of forests, however, decreased by one square mile to 10,701 square miles owing to the recalculation of the areas of the Sitapahar reserve and of the Lebong Cantonment protected forests.

3. **Reservation and demarcation.**—Apart from the four square miles mentioned in the previous paragraph no progress has been made in the final notification of the proposed Ramshai, Khairbari and Torsa reserves owing to lack of funds. Repairs to 1,323 miles of boundary were carried out against 1,260 in the previous year. There still remain 124 miles of boundary to be demarcated, of which 90 form the provincial boundary between Bengal in the Chittagong Hill Tracts and Burma. It is important that this work should be completed as soon as possible.

4. **Working-plans.**—The revised working scheme for the Kurseong division for the year 1919-26 was sanctioned early in the year. The revised working-plans for the Jalpaiguri and Buxa divisions were completed. During the year the compilation of working-plans for the forests in the Chittagong and Chittagong Hill Tracts divisions was commenced. Plans now exist or are under compilation for all areas for which they are required except for 64 square miles.

5. **Communications and buildings.**—One mile of cart road and seven miles of bridle-path were constructed during the year. It is satisfactory to learn that 12 miles of inspection foot-paths were also constructed in the Kasalong and Sitapahar ranges in the Chittagong Hill Tracts division and that they will be useful to the public. The total expenditure on communications amounted to Rs. 18,757 against Rs. 15,904 in the previous year. The total expenditure on buildings was Rs. 33,550 against Rs. 25,311 in 1917-18.

6. **Protection.**—The number of forest offences reported during the year was 3,694 as compared with 2,780 in the previous year. The increase is mainly attributed to increased vigilance by the subordinate staff owing to the grant of adequate rewards to them for the detection of offences, partly to the prolonged drought in the hot weather of 1919 leading to scarcity of fodder and consequently to unauthorised grazing partly to the large influx of tea garden coolies ignorant of forest rules into the Buxa and Jalpaiguri divisions, and partly to the greater expense of living. In 93 per cent. of cases taken into the court convictions were secured.

The area in which special measures for fire protection were in force increased from 367,854 to 396,606 acres, but the area burnt over amounted to 24,876 against 7,566 acres in the previous year. This heavy increase is mainly due to two large fires in the Haldibari and North Borojhar ranges, and is attributed to the unusually dry character of the hot weather. Measures are under consideration for fire protection in the Chittagong and the Chittagong Hill Tracts divisions.

There has been no change in the area open to grazing, which covers 4,747 square miles. The number of cattle impounded during the year was 7,021 against 4,720 in the preceding year. This increase is again attributed to the prolonged drought in the hot weather and the consequent scarcity of fodder.

No definite conclusions can yet be drawn from the observations which are being conducted on the *sal* fungus. Extensive defoliation was caused by the *sal* defoliator in the Buxa division.

Damage to plantations by elephant, bison, pig and deer is being reduced to a minimum by the use of wire-fencing.

7. **Exploitation.**—No change was introduced into the system of disposing of minor produce. There was a large increase in the outturn of bamboos and of thatching materials, but a fall occurred in the revenues derived from grazing and from royalties for the lease of elephant mahals. Only 34 elephants were caught by licensees, of which 7 died. The amount of timber cut or collected by Government agency rose from 353,508 cubic feet in the preceding year to 644,887 in the year under review. This remarkable increase was mainly due to the supply of timber to the Munitions Board; but there are indications, for example the economical working of the Murti Saw Mill, that a more extensive use of the departmental agency for extraction would lead to larger revenues.

8. Industrial investigation and commercial activity were two noteworthy features of the year under review. Mr. H. S. Gibson, Deputy Conservator of Forests, was placed on special duty under the Director of Industries to enquire into the industrial possibilities of the forests of Bengal. On return from leave Mr. J. C. Carroll, Deputy Conservator of Forests, was deputed as Forest Utilisation Officer to carry out further investigations; and Mr. J. A. Pilgrim, I.R.C., was deputed in the month of June last to investigate tannin materials in the Sundarbans. A lease of 120 square miles in the Buxa forests was given to Messrs. Davenport & Co. for the extraction of all trees other than *sal* by duly controlled fellings for the manufacture of tea chests and three-ply wood. Arrangements were under discussion for the grant of a lease of an area in the Kasalong reserve in the Chittagong Hill Tracts to Messrs. Andrew Yule & Co., for the extraction of bamboos for the manufacture of paper pulp. An application by the Acme Tea Chest Company for the grant of a lease to extract timber for three-ply tea chests in some of the reserved forests in Chittagong also came under the consideration of Government. No applications were, however, received from Indian capitalists.

9. It is satisfactory to learn that the number of persons reported as killed by tigers was only 5 as against 14 in the previous year and 51, the average of the last five years. Thirty-five tigers including three cubs and a large proportion of females were killed as against 46 in the preceding year.

10. **Financial results.**—The results of the year's working were eminently satisfactory. The total revenue increased from Rs. 15,01,670 to Rs. 19,55,394, by over 4½ lakhs, due mainly to departmental working in connection with the production of munitions. At the same time the expenditure increased by only a little over half a lakh from Rs. 7,71,124 to Rs. 8,33,634. The surplus amounted, therefore, to Rs. 11,21,760 against Rs. 7,30,546 in the previous year.

11. **Quinquennial review.**—The Government of India in their circular No. 1F.-31-1, dated the 17th January 1912, desired that the orders of Local Governments on the Forest Reports for the years in which a quinquennial review was issued should be accompanied by a brief review of the events and changes of the preceding five years so as to indicate the direction in which the provincial forest policy is tending. This review is due this year. An account of the main features of forest working during the quinquennium will, therefore, be found in chapter VII of the report of the Conservator. Except towards its termination the period has not been marked by any important development. This is due to the fact that it roughly corresponded with the duration of the war when industrial development, except that due to the war, was dormant, expenditure was reduced to a minimum, and new schemes were kept in abeyance. The average annual total receipts during the last five years have been Rs. 14,53,023 as compared with Rs. 14,63,702 during the period from 1909-10 to 1913-14, and the average annual surplus fell from Rs. 8,17,159 to Rs. 7,53,671. An increase of revenue is, however, now expected under the agreements made or under consideration for the working of different forests by commercial agency as well as by a more extended use of the departmental working which led to such a large increase of revenue in the last year of the quinquennium. There has been little

change in the areas under the different classes of forests. Working-plans still cover nearly half the forest area, but working-plans for 1,625 more square miles are under preparation and the revision of others was undertaken. The feature of a revised scheme sanctioned for the Kurseong Forest division was the substitution of artificial for natural production of *sal*. Progress was made in the demarcation of boundaries. One hundred and seventy-five miles were artificially demarcated in the quinquennial period, but 124 miles still remain to be completed mainly in the Chittagong Hill Tracts division. Though there has been a reduction in the area under systematic fire protection during the period from 1,038 to 614 square miles, the forests have been successfully protected from fire. There has been no change in the average area of all classes of forests open to grazing; and protective measures to prevent the most destructive forms of grazing were continued in the Darjeeling, Kalimpong, Jalpaiguri, Buxa and Chittagong divisions. The average annual amount spent on roads, bridges, buildings and other works decreased from Rs. 87,853 during the previous quinquennium to Rs. 70,406 owing to enforced economies. During the period a reorganisation of the Imperial and Provincial staff providing an increased number of appointments was sanctioned; and subsequent to the close of the year the pay and prospects of the Imperial staff have been substantially increased as a result of a consideration of the proposals of the Public Services Commission.

12. The thanks of the Governor in Council are due to Sir Henry Farrington for his careful and efficient administration of the department during the year and for that part of the quinquennium, from the 7th January 1916, during which he held charge of the Bengal circle. His Excellency in Council notices with pleasure the Conservator's appreciation of the good work done by officers of the department during the year.

ORDER.—Ordered that this resolution be published in the gazette and that a copy, with a copy of the report, be submitted to the Government of India.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the *Bhadol* Crops of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under autumn rice in Bengal has represented some 8·5 per cent. of the total area under rice in British India.)

Character of the season.—As stated in the preliminary forecast the weather conditions in the beginning of the season were generally favourable in West Bengal, but less favourable in North and East Bengal, owing to insufficient rainfall. Consequently sowings, which commenced at the usual time in West Bengal, finished somewhat late in North and East Bengal. Good rainfall in June favoured the growth of the crops. Heavy rainfall in July and in the early part of August caused damage in the districts of the Presidency Division, Hooghly, Bogra, Pabna, Malda, Faridpur and Bakarganj. Some injury by insects is also reported from the 24-Parganas, Jessore and Jalpaiguri. On the whole, however, the season was much better than last year.

Acreage.—The total area sown this year with the different *bhadol* crops dealt with in the forecast is estimated at 5,827,800 acres against 5,933,300 acres reported in the corresponding forecast of last year. Of this, the area under autumn rice is returned at 4,961,600 acres against 5,066,600 acres of last year.

Outturn.—According to the estimates of the district officers, the total outturn of the different *bhadol* crops works out to 85 per cent. of the normal as against 77 per cent. reported in the corresponding forecast of last year, and that of autumn rice only to 87 per cent. against 77 per cent. of last year.

Autumn rice.—Accepting 87 per cent. as the outturn of autumn rice this year, the gross outturn of the crop for the province, on the basis of a normal yield of $10\frac{1}{2}$ maunds of clean grain per acre, is estimated at 33,299,400 cwts. against 30,095,600 cwts. reported in the corresponding forecast of last year.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 12th December 1919.

APPENDIX I.

Final Forecast of the *Bhadol* Crops of Bengal, 1919-20.

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
24-PARGANAS.		Acres.	Acres.	Acres.				
	<i>Bhadol</i> paddy (autumn rice).	73,400	62,900	62,500	75	83	Middle of September. Normal.	The outturn is below the normal owing to heavy rain in the Diamond Harbour and Basirhat subdivisions and to want of rain in the Barasat subdivision. Slight damage also by insects was caused in the Barasat subdivision.
	Indian-corn (maize)	100	100	67	83		
	Other <i>bhadol</i> cereals ...	3,600	2,400	1,700	67	75		
	Other <i>bhadol</i> pulses ...							
	<i>Bhadol</i> fruits and vegetables, including root-crops.	1,300	3,800	3,000	58	75		
	Other <i>bhadol</i> food-crops.	5,600	2,200	2,100	92	75		
	<i>Bhadol</i> fodder crops other than jowar, bajra, marua and maize.	...	200	200	83	50		
	<i>Bhadol</i> non-food crops other than fodder and fibres.	100	1,200	1,000	75	67		
	Total ...	84,000	72,900	70,800	74	82		
NADIA.	<i>Bhadol</i> paddy (autumn rice).	491,100	472,800	457,800	83	100	July. Normal ...	
	Mandua, marua or ragi	100	...	300	...	67		
	Indian-corn (maize) ...	800	...	100	...	67		
	Other <i>bhadol</i> cereals ...	8,000	6,700	5,300	67	67		
	Other <i>bhadol</i> pulses ...							
	Indigo ...	1,000	5,000	7,800	67	67		
	<i>Bhadol</i> fruits and vegetables, including root-crops.	6,400	2,100	2,400	58	58		
	Other <i>bhadol</i> food-crops	5,800	1,900	2,100	50	67		
	<i>Bhadol</i> fodder crops other than jowar, bajra, marua and maize.	1,800	3,000	3,100	58	67		
	Mulberry ...	(50)		
	<i>Bhadol</i> fibres other than jute.	200	...	67		
	<i>Bhadol</i> non-food crops other than fodder and fibres.	8,900	15,700	15,700	67	67		
	Total ...	523,900	506,200	494,800	82	97		
MURSHIDABAD.	<i>Bhadol</i> paddy (autumn rice).	229,700	177,900	190,400	75	92	End of July to October. Normal.	The decrease in area under marua, other <i>bhadol</i> cereals and mulberry as compared with the preliminary forecast, is due to revision of estimates after enquiry. The weather has been favourable since the submission of the preliminary forecast. The outturn has fallen below the normal owing to damage caused by drought in the Kandi and by floods in the Laibagh and Jangipur subdivisions.
	Jowar ...	100	100	...	100	...		
	Bajra ...	500	300	200	83	92		
	Mandua, marua or ragi	500	500	500	75	83		
	Indian-corn (maize) ...	1,000	1,000	1,200	83	83		
	Other <i>bhadol</i> cereals ...	3,300	4,000	2,800	67	83		
	Other <i>bhadol</i> pulses ...	2,000	1,100	1,100	67	75		
	Indigo	5,100	3,900	75	83		
	<i>Bhadol</i> fruits and vegetables, including root-crops.	2,000	1,700	2,000	58	75		
	Other <i>bhadol</i> food-crops	5,000	2,800	2,500	75	75		
	<i>Bhadol</i> fodder crops other than jowar, bajra, marua and maize.	2,500	2,200	2,000	67	75		
	<i>Bhadol</i> fibres other than jute.	400	400	600	67	75		
	Mulberry ...	4,000	3,200	3,000	67	75		
	<i>Bhadol</i> non-food crops other than fodder and fibres.	20,000	4,800	3,900	75	67		
	Total ...	271,200	205,100	214,100	75	90		

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
JESSORE.	<i>Bhadol</i> paddy (autumn rice).	407,300	365,000	342,400	75	83	August. Normal ...	The decrease in area this year is due to jute being sown in lands which were sown with paddy last year. The weather was favourable since the submission of the preliminary forecast. The outturn is below the normal on account of the damage caused by flood and cyclone.
	Other <i>bhadol</i> cereals ...	12,200	9,100	10,800	58	75	September. Normal.	
	Other <i>bhadol</i> pulses ...	12,200	8,600	7,200	60	67		
	Other <i>bhadol</i> food-crops.	1,200	790	2,100	50	67		
	<i>Bhadol</i> fodder crops other than jowar, bajra, marua and maize.	12,100	1,000	500	60	100		
	<i>Bhadol</i> non-food crops other than fodder and fibres.							
	Total ...	445,000	384,400	363,000	74	83		
KHULNA.	<i>Bhadol</i> paddy (autumn rice).	17,800	20,200	22,900	100	83	Middle of September. Normal.	The increase in area as compared with last year is due to the fact that the high price of rice this year induced the cultivators to cultivate more lands with <i>bhadol</i> paddy. The weather was favourable at sowing time but heavy rain and floods in the latter part of July caused damage to the crops. Hence the outturn is below the normal.
	Other <i>bhadol</i> cereals ...	200	100	100	85	83		
	Other <i>bhadol</i> pulses ...	600	400	400	85	83		
	<i>Bhadol</i> fruits and vegetables, including root-crops.	14,800	13,000	12,900	85	75		
	<i>Bhadol</i> non-food crops other than fodder and fibres.	300	100	100	92	100		
	Total ...	33,700	33,800	36,400	94	80		
	BURDWAN.	<i>Bhadol</i> paddy (autumn rice).	140,000	110,700	121,300	83	100	
Mandua, marua or ragi.		...	(50)	(50)	83	83	End of September. Late.	
Indian-corn (maize) ...		3,000	1,000	1,200	67	100	Beginning of October. A little late.	
Other <i>bhadol</i> cereals ...		1,000	600	600	92	75	October. Normal.	
Other <i>bhadol</i> pulses ...		1,200	1,000	1,000	83	83		
<i>Bhadol</i> fruits and vegetables, including root-crops.		3,000	2,600	2,700	75	83		
Other <i>bhadol</i> food-crops		1,700	1,100	1,000	92	83		
<i>Bhadol</i> fodder-crops other than jowar, bajra, marua and maize.		200	200	200	100	83		
<i>Bhadol</i> fibres other than jute.		6,000	4,500	5,000	92	92		
Mulberry ...		100		
<i>Bhadol</i> non-food crops other than fodder and fibres.		4,000	2,100	2,000	83	83		
Total ...		180,200	123,800	135,000	83	100		
BIRBHUM.		<i>Bhadol</i> paddy (autumn rice).	144,100	133,100	133,100	83	92	Middle of October. Early.
	Indian corn (maize) ...	1,900	1,900	1,900	75	92		
	Other <i>bhadol</i> cereals ...	1,400	1,200	1,200	67	100		
	<i>Bhadol</i> fruits and vegetables, including root-crops.	10,000	10,000	10,000	67	83		
	Mulberry ...	1,000	(35)	100	67	83		
	<i>Bhadol</i> non-food crops other than fodder and fibres.	2,800	2,800	2,800	100	100		
	Total ...	161,200	149,000	149,100	82	92		

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year and whether that date was early, normal or late.	Remarks by District Officers.	
			Last year.	This year.	Last year.	This year.			
BANKURA.		Acres.	Acres.	Acres.					
	Bhadol paddy (autumn rice).	21,900	5,500	6,000	92	108	Middle to end of September. Late in some places.	The weather was good. The rainfall was seasonable and abundant except in some parts of the district where the sowings of <i>aus</i> paddy were somewhat delayed.	
	Bajra	800	700	700	83	108			
	Mandua, marua or ragi	1,100	800	900	83	108			
	Indian corn (maize) ...	8,400	3,200	4,000	83	108	Middle of August. Normal.		
	Other <i>bhadol</i> cereals ...	2,000	1,500	1,500	83	108			
	Other <i>bhadol</i> pulses ...	2,000	1,500	1,500	83	108			
	Bhadol fruits and vegetables, including root-crops.	2,900	1,500	1,500	83	100			
	Other <i>bhadol</i> food-crops	3,700	4,400	4,000	87	100			
	Bhadol fibres other than jute.	800	700	1,000	83	108			
	Bhadol non-food crops other than fodder and fibres.	1,200	1,000	1,800	75	100			
	Total ...	43,900	21,600	22,900	81	105			
MIDNAPORE.									
	Bhadol paddy (autumn rice).	265,400	102,700	210,700	85	83	September. Normal ..	The weather was not favourable. Owing to heavy rainfall in the beginning and to subsequent drought, the outturn is expected to fall below the normal.	
	Jowar	800	...	500					
	Bajra	1,200	1,400	500					
	Indian corn (maize) ...	8,000	6,900	5,000					
	Indigo	100					
	Other <i>bhadol</i> cereals ...	10,100	5,400	10,500					
	Other <i>bhadol</i> pulses ...	29,300	6,200	8,400					
	Bhadol fruits and vegetables, including root-crops.	26,000	4,400	7,500					
	Other <i>bhadol</i> food-crops.	7,400	5,300	5,900					
	Bhadol fodder crops other than jowar, bajra, marua and maize.	500	600	900					
	Bhadol fibres other than jute.	1,100	1,300	1,600					
	Mulberry	10,200	100	200					
	Bhadol non-food crops other than fodder and fibres.	400	4,300	2,800					
	Total ...	360,500	137,700	254,500	85	83			
HOOGHLY.									
	Bhadol paddy (autumn rice).	45,500	29,800	27,100	76	90	Sadar—Beginning of September. Early. Serampore and Arambagh—End of September. Normal.	The weather was favourable in the Sadar and Serampore subdivisions, but was unfavourable in the Arambagh subdivision where floods caused damage to the extent of about 33 per cent.	
	Indian corn (maize) ...	200	100	100	100	80			
	Other <i>bhadol</i> cereals ...	600	400	400	46	100			
	Other <i>bhadol</i> pulses ...		100	200	66	100

	Bhadol paddy (autumn rice).	140,000	111,700	125,000	80	90	Middle of August.	The weather was favourable since the submission of the preliminary forecast except for some damage caused by flood in the eastern part of the district. The outturn is below the normal owing to unfavourable weather at sowing time and to damage caused by flood.
	Jowar	100	100	80	90	Normal.	
	Bajra	(10)	(10)	...	75		
	Mandua, marua or ragi.	...	(20)	(10)	87	100		
	Indian-corn (maize)	3,000	2,000	75	75		
	Other <i>bhadol</i> cereals ...	2,500	1,500	1,500	35	50		
	Other <i>bhadol</i> pulses	400	300	36	48		
	Bhadol fruits and vegetables, including root-crops.	2,000	200	300	67	80		
	Other <i>bhadol</i> food-crops	2,000	400	400	35	80		
	Bhadol fodder crops other than jowar, bajra, marua and maize.	...	100	100	45	65		
	Mulberry	100	(8)	(5)	45	90		
	Bhadol non-food crops other than fodder and fibres.	200		
	Total ...	146,800	117,400	129,700	60	89		
PANNA.	Bhadol paddy (autumn rice).	140,000	180,000	172,500	60	79	By the end of July.	The decrease in area was due to unfavourable weather condition at sowing time. Want of rain at sowing time damaged the crops to some extent, but the rainfall in June improved their growth. About 21 per cent. of the crops was damaged by the flood in July. Since the submission of the preliminary forecast, there was no considerable change of weather affecting the outturn.
	Indian-corn (maize)	100	...	62	Late.	
	Other <i>bhadol</i> cereals ...	8,000	6,500	6,100	66	79		
	Other <i>bhadol</i> pulses ...							
	Bhadol fruits and vegetables including root-crops.	100	...	62		
	Other <i>bhadol</i> food-crops	30,000	30,000	14,900	66	71		
	Bhadol fodder-crops other than jowar, bajra, marua and maize.	3,500	3,500	700	66	71		
	Bhadol fibres other than jute.	600	...	83		
	Total ...	181,500	220,000	195,000	61	78		
MADHA.	Bhadol paddy (autumn rice).	278,600	254,000	249,200	100	100	Latter part of July.	The weather was favourable since the submission of the preliminary forecast. Slight damage has been done to <i>bhadol</i> paddy and maize by flood. The decrease in outturn except in the case of <i>bhadol</i> paddy and mulberry is due to stunted growth owing to absence of sufficient rain after sowing and partly to want of manuring of fields.
	Jowar	1,800	1,300	1,300	100	92	Normal.	
	Bajra	1,400	1,300	1,200	80	83		
	Mandua	1,600	1,200	1,300	50	67		
	Indian-corn (maize) ...	29,700	16,000	16,000	75	92		
	Other <i>bhadol</i> cereals ...	2,200	3,300	3,800	80	83		
	Other <i>bhadol</i> pulses ...	100	100	100	80	83		
	Bhadol fruits and vegetables, including root-crops.	9,700	6,500	8,500	80	83		
	Mulberry	6,000	13,800	13,800	100	108	August. Normal.	
	Other <i>bhadol</i> food-crops	20,000	19,400	19,500	80	83		
	Bhadol fodder crops, other than jowar, bajra, marua and maize.	2,000	1,100	2,000	60	58		
	Bhadol fibres other than jute.	7,000	1,500	1,800	60	58		
	Bhadol non-food crops other than fodder and fibres.	3,400	3,000	3,000	75	75		
	Total ...	363,500	322,400	321,500	96	97		
DACCA.	Bhadol paddy (autumn rice.)	238,700	267,900	267,400	87	80	July. Normal	The weather was favourable. The <i>bhadol</i> paddy and <i>bhadol</i> fruits and vegetables suffered considerable damage from drought in the early stages. Hence the outturn is below the normal.
	Bhadol fruits and vegetables, including root-crops.	5,000	4,000	4,100	73	70		
	Other <i>bhadol</i> food-crops	28,500	19,500	19,500	93	90		
	Bhadol fodder crops other than jowar, bajra, marua and maize.	3,700	1,800	1,800	90	90

DEPARTMENT OF AGRICULTURE, BENGAL.

Third Forecast of the Cotton Crops of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under the cotton crops in Bengal has represented some 0.3 per cent. of the total area under cotton in India.)

THE "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown mainly in Bankura and Midnapore.

Character of the season.—As reported in the second forecast, the weather was generally favourable excepting in the Chittagong Hill Tracts, where heavy rain in July and August affected the crop. Subsequently the weather proved somewhat favourable to both the crops generally, but rain-fall in the middle of November caused considerable damage in the Chittagong Hill Tracts and thus reduced the outturn appreciably. The prospects of late crop, so far, are reported to be fair.

Area sown.—The total area sown with the early crop is reported to be 66,697 acres and that with the late crop 2,161 acres this year, against 70,786 and 2,203 acres, respectively, in the corresponding and final forecasts of last year.

Outturn.—The estimated outturn of the early crop is reported to be 19,539 bales this year against 25,272 and 30,908 bales, respectively, in the corresponding and final forecasts of last year. The outturn of the late crop is returned at 1,000 bales against 919 and 737 bales, respectively, in the corresponding and final forecasts of last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

Dacca,

The 11th December 1919.

* Conventional area.

† Revised estimate.

(1) The weather has been favourable and the general condition of the crops is good. The date of harvesting of the early crop was normal.

(2) The condition of the crops has not been good owing to excessive rain.

(3) The weather has been fair and the condition of the crop is good.

(4) The weather and general condition of the crop has been fair, but the recent rain has done considerable damage to the crop. The date of harvesting is normal.

(5) Though somewhat unfavourable at the outset, the weather has been favourable to the crop subsequently and the general condition is fair. The date of harvesting is normal.

(6) In Noakhali and in places of Burdwan, the weather has not been favourable. Elsewhere it has been favourable and the present condition of the crops is fair. In Khulna, the plants have all been destroyed by the cyclone in September.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Winter Rice Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18 the area under winter rice in Bengal represents some 19·1 per cent. of the total area under rice in British India.)

Character of the season.—As reported in the first forecast, the weather has been favourable throughout for the broadcast *aman* rice crops. In West Bengal it was also exceptionally good for transplanted *aman* rice in the period July-September. Insufficient rain in October, however, affected the yield of crops on high lands to a slight extent. In East and North Bengal the conditions were not good for transplanted rice in July and August owing to deficient rainfall during this period. At one time matters looked somewhat serious, and large areas were transplanted at a later date than is usual. In September, however, the rainfall was generally in excess and the heavy rain brought by the cyclone in East Bengal did great good to late transplanted rice. On the whole, it may be said that the broadcast *aman* rice is very good and that the transplanted rice crop is satisfactory.

Acreage.—According to district officers' estimates the total area under winter rice amounts to 15,551,400 acres as against 15,379,400 acres in the first forecast of this year and 15,962,100 acres in the corresponding forecast of last year. The increase of 172,000 acres over the first forecast was due to good rainfall in September.

Outturn.—From the district returns appended it will be seen that Bankura, Malda and Bakarganj report more than a normal crop and seventeen districts report a crop between 80 and 92 per cent. The outturns for the remaining seven districts are as follows :—

Burdwan, Hooghly, Rangpur and Noakhali (75 per cent. each), Nadia and Murshidabad (67 per cent. each), and the Chittagong Hill Tracts (50 per cent).

As compared with the first forecast the crop has improved in ten districts, deteriorated in eleven and remained stationary in the rest.

On the basis of the above figures the provincial outturn is estimated at 89 per cent. of the normal against 77 per cent. in the corresponding forecast of last year.

I consider 90 per cent. a fair estimate, and accepting this figure the gross outturn for the province, on the basis of a normal yield of $12\frac{1}{2}$ maunds of clean grain per acre, is estimated at 128,537,100 cwts. against 112,874,900 cwts. returned in the corresponding forecast of last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 13th December 1919.

APPENDIX I.

Second Forecast of the Winter Rice Crop of Bengal, 1919-20.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		The date by which the harvesting generally commenced this year, and whether that date was early, normal or late.		Remarks by District Officers.
		Last year. (1918-19).	This year. (1919-20).	Last year.	This year.			
	Acres.	Acres.	Acres.					
24 Parganas ...	1,041,500	893,200	825,100	83	92	November.	Normal.	Excessive rain since the submission of the first forecast has caused a little damage to crops on low lands in the Diamond Harbour subdivision and unusual heavy rainfall in the Bashirhat subdivision damaged to some extent the plants in the Sundarban tracts owing to breaches in the embankments. Hence the outturn is expected to fall below normal.
Nadia ...	136,800	125,600	130,100	58	67	Not yet commenced		The increase in area sown is due to the favourable weather at the sowing time. The outturn is expected to be much below the normal owing to want of rain since the submission of the first forecast.
Murshidabad	346,600	326,300	318,700	53	67	Ditto	...	The increase in area sown as compared with the first forecast is due to subsequent transplantation. Crop suffered for want of sufficient rainfall. About 25 per cent. of the crop has been damaged owing to drought and flood in Jangipur subdivision. The outturn is expected to fall below the normal on account of drought at the flowering time.
Jessore ...	568,100	462,500	455,500	67	80	Beginning of November.	Normal.	The decrease in area sown as compared with that of the last year is due to the corresponding increase of jute area and also owing to inundation at the time of sowing and transplantation. Insect-pests have affected the crops in Bengong and Magura subdivisions. The outturn is expected to be below normal owing to the damage caused by flood and insect-pests.
Khulna ...	826,200	734,100	703,700	85	92	Ditto	...	The outturn is expected to fall below normal owing to the damage caused by the cyclone.
Burdwan ...	874,800	700,000	736,000	66	75	Not yet commenced		The weather since the submission of the first forecast has not been favourable except at Asansol. Insufficient rainfall in the latter part of September and in October has considerably reduced the outturn of the late transplanted crop. The rainfall in November is likely to do much more harm than good and the outturn is expected to fall much below the normal.
Birbhum ...	604,600	601,500	601,500	67	92	Ditto	...	The weather has been good and a fairly good outturn is expected.
Bankura ...	510,600	520,000	525,000	62.5	125	Second week of November.	Normal.	Insufficient rainfall in the latter part of September and in October affected the crop on high lands in parts of the district. Since the submission of the first forecast about 33 per cent. of crop has been affected by drought and insufficient rainfall.
Midnapore ...	1,637,100	1,648,000	1,493,800	60	83	First week of December.	Normal.	Want of rainfall has adversely affected the growth of crops.
Hooghly ...	276,700	195,800	206,400	73	73	Not yet commenced		The weather has not been favourable since the submission of the first forecast. Insufficient rainfall has affected the crops seriously. The outturn is expected to fall much below the normal owing to long continued drought.
Howrah ...	125,200	114,400	119,500	79	90	Ditto	...	The weather has not been favourable since the submission of the first forecast. Want of rain in the latter part of the season retarded growth of the crops.
Rajshahi ...	697,000	620,000	656,300	53	90	Ditto	...	The outturn is anticipated to fall below normal owing to insufficient rainfall at the sowing time.
Dinajpur ...	1,120,300	1,019,100	1,029,000	57.3	83	Ditto	...	The increase in area sown is due to sufficient rainfall since the submission of the first forecast. Owing to the weather being not favourable at the beginning, the outturn is estimated to fall below the normal.
Jalpaiguri ...	551,300	497,400	417,500	85	80	Ditto	...	The outturn is expected to fall below the normal owing to unfavourable weather and want of sufficient rainfall at the time of sowing.
Darjeeling ...	65,200	35,900	35,600	92	93	First week of November.	Normal.	Effects of weather on the growth of crop have been fairly good on the whole.
Rangpur ...	823,300	674,000	600,000	69	75	Not yet commenced		The outturn is expected to be much below normal owing to drought in August.
Bogra ...	303,000	450,000	447,000	44	85	End of November.	Normal.	The weather was favourable up to the third week of October, but continued absence of rain since then has done injury to the late transplanted paddy. On account of low flood paddy on high lands in the eastern part of the district was damaged. Hence the outturn falls below the normal.
Fabna ...	566,000	520,000	382,500	60	92	First week of November.	Normal.	The present prospect is promising.
Malda ...	326,200	220,000	303,000	60	117	Latter part of November.	Normal.	The weather has been favourable on the whole, though in some places crop suffered a little for want of rain in the latter part of October. More than normal outturn is expected.

* Revised.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		The date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.		
	Acres.	Acres.	Acres.				
Dacca ...	647,900	649,000	655,300	75	85	Beginning of November. Normal.	The weather was quite reasonable and a very good crop was expected until 24th September when a severe cyclone swept over the district. Since then the weather has been favourable. The cyclone made considerable damage; the outturn is therefore estimated to fall below the normal.
Mymensingh ...	1,126,700	969,700	969,700	75	92	Not yet commenced	The weather was generally favourable. The outturn is below the normal owing to cyclone and want of rain in some parts of the district, specially at the sowing time.
Faridpur ...	770,100	740,000	734,700	69	84	End of October. Normal.	The weather has been fairly favourable. Some damage was done by cyclone which accounts for the estimated outturn to fall below the normal.
Bakarganj ...	1,200,000	1,340,000	1,342,500	120	117	November. Normal.	The weather has been favourable and the outturn is expected to be above normal.
Chittagong ...	418,400	426,100	420,600	95	83	November and December. Normal.	Insufficient rainfall in the month of October and cloudy weather without rain for some days in November is likely to reduce the outturn.
Tippera ...	724,800	780,600	806,500	60	92	November. Normal.	Increase in area is due to favourable weather. Slight damage was, however, done to the crop by the cyclone of September.
Noakhali ...	610,000	600,000	600,000	85	75	Early in November. Normal.	Insufficient rainfall in October has been harmful to the crop in the Sadar subdivision. Some damage was caused by <i>ufra</i> disease. In Feni subdivision the rainfall in October has done good.
Chittagong Hill Tracts.	47,500	41,600	46,900	100	50	Not yet commenced.	The outturn is expected to fall much below the normal for want of sufficient rainfall.
Total Bengal	16,843,900	15,895,800	15,551,400	72	89

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under linseed in Bengal has represented some 5·5 per cent, and that under rape and mustard 19·3 per cent, of the total area under these crops in British India.)

Explanatory.—Three forecasts are issued for the spring oilseed crops. The present one deals only with the area sown and the general condition of the crops.

Area sown.—Oilseeds are grown chiefly in Rajshahi, Dacca and the Presidency Divisions. In the other two divisions the cultivation is small. The total area under these crops (excepting sesamum for which separate forecasts are issued) is reported to be 1,280,000 acres this year against 1,296,800 and 1,304,800 acres respectively in the corresponding and final forecasts of last year.

Character of the season.—The rainfall in September was generally in excess of the normal in North and East Bengal and was somewhat defective in West Bengal. There was plenty of moisture in the soil for preparatory tillage which began in usual time. Light rain in October facilitated the sowings of the crops. In the early part of November, the sowings were somewhat retarded in some parts of West Bengal through lack of soil moisture, but rainfall in the middle of the month greatly facilitated matters. The outlook is, so far, reported to be promising.

DACCA,
The 17th December 1919.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPENDIX I.

First Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	ESTIMATED AREA UNDER SPRING OILSEEDS.		Date by which the sowing of the crops was begun this year.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).		
		Acre.	Acre.	%Acre.		
24-Parganas ...	Linseed ...	1,600	600*	600*	October to second week of November.	The sowings were normal. The weather has been favourable and condition of the crops is fair.
	Rape and mustard ...	1,500	800*	800*		
	Other oilseeds (excepting <i>oil</i>).	800	300	200		
	Total ...	3,400	1,700	1,600		
Nadia ...	Linseed ...	55,700	32,900	33,400	October ...	The sowings were normal. The weather has been favourable except in the Ranaghat subdivision and in parts of the Sadar subdivision. The condition of the crops is good.
	Rape and mustard ...	23,300	14,400	15,300		
	Other oilseeds (excepting <i>oil</i>).	18,900	5,300	3,700		
	Total ...	98,100	49,900	52,400		
Murshidabad ...	Linseed ...	20,800	13,000	14,900	Middle of October.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	18,900	12,300	14,700		
	Other oilseeds (excepting <i>oil</i>).	8,700	5,100	3,400		
	Total ...	48,400	28,400	33,000		
Jessore ...	Linseed ...	24,000	9,400	8,200	October and November.	The sowings were normal and the weather has been favourable. The condition of the crops is good on the whole.
	Rape and mustard ...	49,600	18,000	17,600		
	Other oilseeds (excepting <i>oil</i>).	3,300	1,900	2,300		
	Total ...	76,900	29,300	28,100		
Khulna ...	Linseed ...	900	100	100	First week of November.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	23,700	18,600	12,500		
	Other oilseeds (excepting <i>oil</i>).	100	500	...		
	Total ...	30,700	19,200	12,600		
Burdwan ...	Linseed ...	22,500	7,700	6,400	Last week of September to the second week of November.	The sowings were normal and the weather has been favourable. The condition of the crops is good in Asansol and Katwa and fair in Balua subdivisions. In the Sadar subdivision the crops are suffering for want of rain.
	Rape and mustard ...	21,100	8,100	5,200		
	Other oilseeds (excepting <i>oil</i>).	1,500	100	800		
	Total ...	45,100	15,900	15,400		
Birbhum ...	Linseed ...	800	800*	800*	October ...	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	2,900	2,000*	2,000*		
	Other oilseeds (excepting <i>oil</i>).	200	200	300		
	Total ...	3,900	3,000	3,100

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	ESTIMATED AREA UNDER SPRING OILSEEDS.		Date by which the sowing of the crops was begun this year.	Remarks by District officers.
			Last year (1918-19).	This year (1919-20).		
		Acres.	Acres.	Acres.		
Barjeeling	Rape and mustard	7,000	2,800	2,800	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Other oilseeds (excepting <i>til</i>).	200	200	200		
	Total	7,200	3,000	3,000		
Rangpur	Rape and mustard	160,000	118,000	124,000	Latter part of October. Normal.	The sowings were normal. The weather has been favourable. The condition of the crops is good.
	Other oilseeds (excepting <i>til</i>).	1,100	200	200		
	Total	161,100	118,200	124,200		
Bogra	Linseed	1,000	1,600	1,800	Middle of October	The weather condition was not favourable at the sowing time but has afterwards become favourable.
	Rape and mustard	60,000	12,500*	14,000		
	Other oilseeds (excepting <i>til</i>).	...	200	300		
	Total	61,000	13,800	16,100		
Pabna	Linseed	7,600	8,500	10,800	End of October	The sowings were normal. The weather has been favourable. The condition of the crops is good.
	Rape and mustard	110,000	114,500	72,900		
	Total	117,600	123,000	83,700		
Maidha	Linseed	6,000	3,500	4,000	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard	30,900	10,900	11,000		
	Other oilseeds (excepting <i>til</i>).	2,500	1,200	1,200		
	Total	38,500	14,700	16,200		
Dacca	Linseed	1,300*	4,600	1,400	Beginning of November.	The sowings were normal. The weather has been favourable. The condition of the crops is good. The increase in area sown, as compared with that of the last year, is due to some of the lands under winter paddy, damaged by cyclone, being utilized for growing spring oilseed crops.
	Rape and mustard	88,600*	74,900	88,700		
	Other oilseeds (excepting <i>til</i>).	1,700*	...	1,700		
	Total	91,600	79,500	91,800		
Mymensingh	Linseed	13,800	13,800	15,800	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard	430,700	472,300	472,300		
	Other oilseeds (excepting <i>til</i>).	300	300	300		
	Total	444,800	486,400	488,400		
Faridpur	Linseed	5,900	5,100	5,900	October	The sowings were normal. The weather has been favourable. The condition of the crops is good.
	Rape and mustard	25,700	25,700	24,300		
	Other oilseeds (excepting <i>til</i>).	1,100	1,100	1,100		
	Total	32,700	32,900	31,400		

* Revised on the basis of settlement records.

1474 SUPPLEMENT TO THE CALCUTTA GAZETTE, DEC. 24, 1919.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	ESTIMATED AREA UNDER SPRING OILSEEDS.		Date at which the sowing of the crops was begun this year.	Remarks by District Officers.
			Last year (1918-19).	This year (1919-20).		
		Acres.	Acres.	Acres.		
Bakarganj ...	Linseed	4,400	4,400	4,400	October and November.	The sowings were normal. The weather was favourable at the beginning of the season, but rain in the middle of November has damaged about 15 per cent. of the crops. The present condition of the crops is however good. Owing to high price of mustard oil the cultivation of the crop has increased.
	Rape and mustard ...	1,100	1,500	3,000		
	Other oilseeds (excepting <i>til</i>).	200	100	100		
	Total ...	5,800	6,000	7,500		
Chittagong ...	Linseed	100	100	100	October to November.	The sowings were normal. The weather has not been very favourable. The condition of the crops is fair.

	Other oilseeds (excepting <i>til</i>).	100	100	100		
	Total ...	5,800	2,200	2,200		
Tippera ...	Linseed	4,800	4,300	5,200	October ...	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	34,500	26,300	26,100		
	Other oilseeds (excepting <i>til</i>).	800	600	500		
	Total ...	40,100	31,200	29,800		
Noakhali ...	Linseed	5,000	6,000	7,000	November ...	The sowings were normal. The weather has been favourable for the growth of the crops. The condition of the crops is fair.
	Rape and mustard ...	600	600	600		
	Other oilseeds (excepting <i>til</i>).	700	900	900		
	Total ...	6,300	7,500	8,500		
Chittagong Hill Tracts.	Rape and mustard ...	13,900	12,000	12,100	Second week of November.	The sowings were normal. The weather was favourable so long, but the present cloudy weather attended with rain has damaged the crops to some extent.
Total Bengal	Linseed	223,100	144,400	145,200		
	Rape and mustard ...	4,358,600	1,125,400	1,097,100		
	Other oilseeds (excepting <i>til</i>).	67,600	35,000	37,700		
	Total ...	1,649,300	1,304,800	1,280,000		

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR NOVEMBER 1919.

I. **Character of the season.**—During the middle of the month, rainfall was general throughout the province. The fall was above the average everywhere, excepting in Birbhum, and in some northern districts where it was defective. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of winter paddy commenced. Sowing of spring crops proceeded favourably, though lack of moisture in the early part of the month retarded operations somewhat in parts of West Bengal. The rainfall in the middle of the month greatly facilitated sowings.

III. **State of standing crops.**—The condition of standing crops was reported to be generally satisfactory.

IV. **Prospects and probable outturn.**—The rainfall in the middle of the month somewhat benefited the late transplanted paddy and greatly helped the growth of vegetables and other standing crops. The outturn of autumn crops was satisfactory for the province as a whole.

V. **Damage to standing crops.**—Some damage to highland winter paddy was caused by drought in Burdwan and Bankura, while early cotton in the Chittagong Hill Tracts suffered from too much rain in the middle of the month. *Ufra* disease and insects caused some damage in parts of Faridpur and Noakhali.

VI. **Condition of agricultural stock.**—The condition of live-stock was reported to be fair on the whole. Cattle-disease was, however, reported from places in Nadia, Murshidabad, Khulna, Birbhum, Jalpaiguri, Darjeeling, Malda, Mymensingh, Faridpur and Tippera.

VII. **Failure of pasturage and fodder.**—The supply of fodder was sufficient throughout the province except in parts of Khulna and Faridpur where insufficiency of fodder was reported.

VIII. **Prices of food-grains.**—During the second fortnight of the month the price of common rice rose in the districts of Khulna, Bankura, Dacca, Noakhali and the Chittagong Hill Tracts, fell in twelve districts and remained stationary in the remainder. It varied from 4½ seers a rupee in Khulna, Rangpur, Mymensingh and Bakarganj to 7 seers a rupee in Birbhum and Chittagong.

IX. **Condition of agricultural people.**—The condition of the agricultural population shewed a tendency towards improvement.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 11th December 1919.

Summary.—The week was rainless. Reaping of winter paddy is in full swing. Sowing of spring crops is fast approaching completion. The condition and prospects of standing crops are so far reported to be promising. The average price of common rice for the province has fallen by about 5·63 per cent. as compared with that of the previous week.

REMARKS—

1. The above table is compiled from returns collected by the Municipalities and submitted to this office by the Civil Surgeons. Taken as a whole, the statistics are incomplete.
2. The vital statistics of Municipalities with a population of less than 10,000 have been excluded from this statement and incorporated in the statement of the Districts.
3. The birth and death ratios per 1,000 per annum have been omitted from this statement according to the Government of India, Education Department.

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Winter Tii (Sesamum) Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under tii in Bengal has represented about 4·9 per cent. of the total area under tii in British India.)

Character of the season.—Owing to uneven distribution of rainfall the weather at sowing time was, on the whole, unfavourable for the crop throughout the province. Subsequently conditions were rather better until the end of October; but continued drought since then has generally stunted the growth of the crop and, in many districts, considerably reduced the outturn in consequence. Insect-pests also caused some damage in places, especially in Rajshahi, Jalpaiguri, Nadia and Bogra. In Khulna, owing to excessive rain at sowing time, the crop could not be cultivated at all this year, and in Pabna about 3,000 acres were left unsown. On the whole the season has not been better than last year.

Acreage.—The total area sown this year is estimated at 42,600 acres against 49,400 acres last year.

Outturn.—According to estimates of District Officers the outturn of the crop for the province as a whole works out at 68 per cent. of the normal against 62 per cent. last year. Taking 6½ maunds as the normal rate of yield per acre, the gross outturn for the province is estimated at 6,500 tons against 6,900 tons last year.

DACCA;
The 23rd December 1919.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPENDIX I.

Forecast of the winter *till* crop of Bengal, 1919-20.

District.	Estimated normal area under winter <i>till</i> .	Estimated area under winter <i>till</i> .		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date is early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.			
	Acres.	Acres.	Acres.					
24-Parganas ...	300	300*	300*	58	58	August. Normal...	Not yet commenced	The weather has not been favourable owing to untimely rainfall.
Nadia ...	5,300	900	1,000	42	50	July and August. Normal.	November. Normal.	The weather was not favourable at sowing time. Some damage was caused by insects and drought. Hence the outturn is expected to fall much below the normal.
Murshidabad ...	4,100	900	900	58	67	End of August to November, normal except Jangipur. Late.	Not yet commenced	The weather was not favourable at sowing time, but since then it is favourable. The outturn is anticipated below the normal owing to unfavourable weather at sowing time.
Jessore ...	1,600	900	1,100	42	58	August. Normal	November. Normal.	The increase in area is due to favourable weather at sowing time. Slight damage has been caused to the crop for want of rain in September. Hence the outturn is expected to fall below the normal.
Kaunia ...	2,800	900	...	85	Owing to the excessive rain the cultivators could not sow the crop this year.
Burdwan ...	500	200	300	58	50	Beginning of September and October. Normal.	Not yet begun ...	The increase in area is due to favourable weather and to adoption of an assumed area for Asansol subdivision. The weather was fair, but has been dry later on. The outturn is much below the normal owing to deficient rainfall.
Birbhum ...	500	500*	500*	67	75	August. Normal	December ...	The weather and condition of the crop have been fair. The outturn is below the normal owing to want of timely rain.
Bankura ...	3,300	2,600	3,000	67	106	August. Normal	December. Normal.	The increase in area is due to high price of oil and demand for oilseeds. The weather was quite favourable at sowing time but slight damage has been caused to crop owing to drought in October. The outturn is expected to be slightly above normal.
Midnapore ...	8,000	2,800	2,300	60	75	July. Normal ...	September. Normal.	The weather has not been favourable. The outturn is, therefore, expected to fall below the normal.
Hooghly ...	1,000	700*	700*	65	50	Middle of September. Normal.	End of November. Normal.	Owing to unfavourable weather the outturn has fallen much below the normal.
Howrah ...	100	(40)	(45)*	83	83	Middle of October. Normal.	Middle of November. Normal.	Some damage has been done by drought. Hence the outturn is below the normal.
Rajshahi ...	2,700	600	1,100	50	50	Middle of September. Normal.	End of December. Normal.	The increase in area is due to the favourable condition of weather at sowing time and to high prices of oilseeds. The weather has been fair. Considerable damage has been caused by insect-pest in Naogaon subdivision. Hence the outturn is expected to fall much below the normal.
Dinajpur ...	800	400*	400*	60	77	August to September. Normal.	Not yet commenced	The weather has been favourable at sowing time. Owing to inadequate rainfall the outturn is expected to fall below the normal.
Jalpaiguri ...	1,000	500	50	July. Normal.	November. Normal	The crop is not grown in this district to any appreciable extent. Some people of the Falakata tahsil in the Alipore subdivision have grown the crop this year only. The weather has been favourable. About half the crop has been damaged by insect-pests.
Rangpur ...	1,300	1,500*	1,500*	100	100	October. Normal.	Will begin from January.	The weather has been favourable and a normal outturn is expected.
Bogra ...	1,600	600	600	50	50	Middle of August. Normal.	Middle of November. Normal.	The weather was not favourable at sowing time, but the growth of the crop has been retarded owing to absence of rain. Some damage has been caused by insects. The outturn is therefore expected to fall much below the normal.

* Conventional area.

District.	Estimated normal area under winter <i>til</i> .	Estimated area under winter <i>til</i> .		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date is early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.			
	Acres.	Acres.	Acres.					
Pabna ...	7,000	6,000	3,000	65	30	Middle of September. Normal.	End of December. Normal.	The decrease in area is due to the fact that about 3,000 acres could not at all be sown owing to rain in the early part of September. Hence the outturn is much below the normal.
Malda ...	1,500	1,500*	1,500	50	92	September. Normal.	December. Normal.	On the whole the weather was favourable at sowing time. The falling off of outturn below the normal is due to stunted growth owing to absence of rain since middle of October.
Dacca ...	3,900	8,800	3,900	72	75	End of August. Normal.	End of November. Normal.	Figures for normal area have been revised on the basis of settlement records. Want of rain at the sowing time did some damage to the crop.
Mymensingh ...	8,600	7,800	7,800	85	95	August and September. Normal.	December and January. Normal.	The weather and condition of the crop have been generally favourable.
Chittagong ...	200	200*	200*	90	100	August. Normal.	November. Normal.	The weather has been good.
Tippera ...	3,200	1,400	1,400	60	75	October. Normal.	Not yet commenced.	The weather has not been quite favourable. Some damage has been done by insects. Hence the outturn is expected to be below the normal.
Chittagong Hill Tracts.	13,000	10,500	10,600	35	35	Last week of May. Late.	Middle of November. Normal.	The weather and condition of the crop have not been favourable. The outturn is expected to be poor.

J. C. ROY,
for Director of Agriculture, Bengal.DACCA ;
The 27th December 1919.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the seven months, April to October, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the seven months, April to October, 1919, amounted to 14,816,000 maunds, as against 7,594,000 maunds in the corresponding period of the preceding year—an increase of 95 per cent. There was an increase (14 per cent) in the imports of coal and coke (56,569,000 maunds as against 49,511,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 70 per cent, the total value amounting to Rs. 5,64,28,000 as against Rs. 3,32,25,000 in 1918. The quantity of indigo imported during the seven months, April to October, 1919, decreased from 5,733 maunds to 2,919 maunds. The imports of raw jute amounted to 2,564,000 bales as against 2,945,000 bales—a decrease of 13 per cent. The importations of gunny bags also showed a decrease of 29 per cent (206 million bags as against 293 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 13 per cent, from 4,136,000 maunds to 4,663,000 maunds. The imports of sugar decreased by 18 per cent, from 394,000 maunds to 325,000 maunds, and those of tea by 10 per cent, from 2,023,000 maunds to 1,830,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the seven months, April to October, 1919, increased by 9 per cent (Rs. 14,99,35,000 as against Rs. 13,78,69,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 825 million bags to 634 million bags, and the shipments of gunny bags to other Indian ports decreased from 24 millions to 21 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 2,914,000 maunds to 3,363,000 maunds, or by 15 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the seven months, April to October, 1919, compared with the corresponding months of 1918.
